NOTES:

These figures are the average of the monthly snapshot data of the custodial population, taken on the last Friday of the month or the first Friday of the following month, depending on which is nearer to the actual month end.

The average population for 2001 has been amended to reflect published figures. The January to March 2001 data for males and females has been scaled up to the total. There were recording issues in the initial stages of implementation. The 2010 average custodial population figures are provisional
